NATURAL DEFENCES

PREBIOTICS & L.I.P.

Digestive health

An exclusive combination of nutrients to support optimal digestive security (L.I.P. proteins) and a balanced intestinal flora (prebiotics: fructo-oligo-saccharides, mannan-oligo-saccharides) which also contribute to good stool quality.

2ND GROWTH PHASE: MUSCLE DEVELOPMENT

An adapted protein and L-carnitine content to help support muscle development in giant breed puppies during the second growth phase from 8 months old.

BONE & JOINT SUPPORT

Contributes to good bone mineralisation in giant breed puppies thanks to a balanced intake of energy and minerals (calcium and phosphorus), thus supporting bone consolidation and joints.
